EVOLUTION OF NATURAL GAS PRICES

Source: World Bank

Since 2009, the US industry gained a significant competitive advantage over the EU industry as a result of the shale oil revolution. Gas prices around the world rose in 2021 as Covid-19 measures were lifted and economies returned to normal. This trend was enhanced in February 2022 in Europe as a result of Russian war on Ukraine.

Note: Prices may differ from the FuelsEurope Statistical Report 2022 as prices were calculated in CIF: cost + insurance + freight (average prices). This new version of the graph presents prices in nominal dollars.

*Natural Gas (Europe), from April 2015, Netherlands Title Transfer Facility (TTF); April 2010 to March 2015, average import border price and a spot price component, including UK; during June 2000 - March 2010 prices excludes UK.

**Natural Gas (U.S.), spot price at Henry Hub, Louisiana
