# NEW BUSES IN THE EU BY FUEL TYPE IN 2021

Source: European Automobile Manufacturers' Association

In 2021, 4.3% of new buses were electrically-chargeable vehicles, 5.7% are hybrid electric, 7.6% ran on alternative fuels, while diesel still fuelled 82.4% of all buses sold in the European Union. The proportion of alternatively-powered new buses decreased from 26.8% in 2020 to 17.6% in 2021.

**Note:** Please note that due to rounding, figures may not add up exactly to 100%.
