## NEW TRUCKS IN THE EU BY FUEL TYPE IN 2022

Source: European Automobile Manufacturers' Association

The use of low-carbon technologies in trucks remains minor with 96.6% of all newly-registered trucks in the European Union running on diesel. Alternative fuelled and electrically-chargeable trucks represent a small share of sales in 2022 with a 2.8% and 0.6% share, respectively.

**Note:** Please note that due to rounding, figures may not add up exactly to 100%
