

The Union Database is a vital step to reinforce traceability.

Brussels, 14 April 2025: FuelsEurope supports legal action against fuel fraud. We call for a stronger EU certification system that protects honest players and keeps our climate goals on track. The Union Database (UDB) is a vital step to reinforce traceability. We must extend its scope, improve its productivity and ensure IT

security. The revision of the certification framework defined by Implementing Regulation (EU) 2022/996 is an opportunity for fighting fraud, harmonizing imports and protecting competitiveness.

- ENDS -

FuelsEurope, the voice of the European fuel manufacturing industry. FuelsEurope represents, within the EU institutions, the interest of 40 companies manufacturing and distributing conventional and renewable fuels and products for mobility, energy and feedstocks for industrial value chains in the EU.
